SUMMARY

Frontend Developer with 3+ years of experience building production web applications using **React, Angular, and TypeScript**. My work covers a multi-tenant digital health platform, enterprise financial systems for government institutions, and AI-driven SaaS products. Focused on clean component architecture, API integration, realtime features, and UI state management.

EXPERIENCE

Frontend Developer

Doorkita Technologies

October 2025 - Present

- Built a multi-tenant digital health platform (EHR, telemedicine, lab and pharmacy networks, insurance suite), working alongside a product designer, a backend developer and a mobile developer.
- Build and maintain the main clinical application (Angular, Angular Material, Sass) and the public React website.
- Integrated dozens of REST APIs across clinical, lab, pharmacy and insurance workflows, with realtime WebSocket chat and video consultations on the Agora Video SDK.

Team Lead & Developer

LevelUp

April 2025 - Present, Lagos

- Led teams as a developer and mentor to deliver successful web applications.
- Built the LevelUp AI-driven LMS application featuring personalized course generation, adaptive assessments, and progress tracking.
- Mentored students from zero to hero in frontend development and general software engineering.
- Acted as a team leader for over a year, ensuring the successful delivery of multiple outstanding projects.

Frontend Developer

Encentral Solutions Limited

January 2025 - December 2025, Abuja

- Collaborated with cross-functional teams to build and maintain large-scale enterprise applications including NDIC BLMS and NSIA Procurement System using Angular and Angular Material.
- Implemented frontend logic for various projects such as NAQS Aquatic, ensuring seamless integration with backend services and optimal performance.
- Focus on delivering production-ready code while adhering to strict documentation and architectural guidelines.
- Contributed to the full software development lifecycle from planning to deployment in live environments.

Frontend Developer Mentor

Kodespot

May 2024 - June 2025, Ilorin

- Mentored students in frontend development, guiding students from foundational concepts to advanced implementation.
- Provided technical leadership and support to help students build real-world projects.
- Devised comprehensive curriculum enhancements to align training modules with current industry standards and tools, enriching the learning experience for aspiring frontend developers.

Frontend Developer Intern

Encentral Solutions Limited

June 2024 - November 2024, Abuja

- Collaborated with a team of 5 developers to build an employee management system using Angular and TypeScript.
- Focused on practicing frontend technologies and refining development skills through weekly assignments and real-world project contributions.
- Gained experience in team-based software development workflows and version control.

Frontend Developer Intern

Softrays IT

June 2023 - November 2023, Ilorin

- Engaged in intensive training and practice sessions focused on frontend development fundamentals.
- Built small-scale frontend projects to solidify knowledge in HTML, CSS, and JavaScript.
- Learned and applied UI/UX design principles, focusing on wireframing and prototyping.
- Enrolled in and completed Meta Frontend Developer course on Coursera for hands-on framework experience.

Digital Marketing Intern

Obatech Computer Training School

February 2022 - June 2022, Ilorin

- Built and managed websites using WordPress focusing on blog creation and content strategy.
- Executed comprehensive SEO strategies, covering both on-page and off-page optimization to improve search rankings.
- Created and managed social media accounts for targeted marketing and advertising campaigns.
- Gained hands-on experience in digital marketing and professional website management.

PROJECTS

Kostody (Mobile Repair Trust Platform)

Personal • [kostody.vercel.app](#) • August 2026 – Present

- Built a mobile repair platform that turns every repair into a locked, tamper-proof record both sides can trust: time-stamped condition photos, PIN-locked quotes, and a live shared record.
- Designed the product and built the React apps, and the backend on Prisma and Supabase (PostgreSQL).

Doorkita (Digital Health Platform)

Doorkita Technologies • [doorkita.com](#) • October 2025 – Present

- Built a multi-tenant digital health platform connecting hospitals, clinics, labs, pharmacies, insurers and patients, covering the EHR, telemedicine, lab and pharmacy networks, and an insurance suite.
- Built role-based access and routing across 7+ user types, realtime provider-patient chat, and video consultations on the main Angular clinical application.

LevelUp (AI personalized Learning Management System)

LevelUp • [levelup-curriculum.netlify.app/](#) • April 2025 – Present

- Engineered an AI-driven learning management system that tailored educational content to individual learner profiles, integrated adaptive assessments, and incorporated real-time progress tracking for enhanced engagement and measurable learning outcomes.

NDIC BLMS (Bank Liquidation Management System)

Encentral Solutions Limited • April 2025 – December 2025

- Collaborated with a cross-functional team of developers to build the frontend of the Bank Liquidation Management System using Angular and Angular Material.
- Contributed to the development of complex, responsive user interfaces for managing critical financial liquidation data.
- Collaborated with backend engineers to integrate APIs and maintain consistent system functionality across the platform.
- Followed enterprise-level documentation and coding standards to deliver production-ready features within a team-based environment.

NSIA Procurement System

Encentral Solutions Limited • February 2025 – December 2025

- Maintain and apply updates to production procurement management system.
- Collaborate with cross-functional teams to implement new features and resolve system issues.
- Ensure system reliability and optimal performance for end users.

NAQS Aquatic System

Encentral Solutions Limited • January 2025 – December 2025

- Orchestrate system updates and implement feature improvements based on user requirements.
- Collaborate with backend and QA teams to ensure seamless system functionality.
- Optimize system performance through regular maintenance and code reviews.

EDUCATION

Bachelor of Engineering in Computer Engineering

University of Ilorin • Ilorin, Nigeria • 2024

SKILLS

Languages & Web Fundamentals: JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass, CSS Modules

Frameworks & Libraries: React, Angular, Next.js, RxJS, Angular Material, Tailwind CSS

Tools & Workflow: Git, GitHub, REST APIs, WebSockets, Vite, Vercel
