SUMMARY

Frontend Developer with a strong foundation in JavaScript, React, HTML, and CSS, and extensive experience in Web3 and Blockchain integration. Proven track record of leading teams and mentoring developers to deliver successful projects. Specialized in building decentralized applications (dApps) using SDKs and smart contract integration across multiple chains including Hedera, Solana, SUI, and IOTA. Experienced in both enterprise Web2 environments and cutting-edge Web3 platforms.

EXPERIENCE

Frontend Developer

Encentral Solutions Limited

January 2025 - December 2025, Abuja

- Collaborated with cross-functional teams to build and maintain large-scale enterprise applications including NDIC BLMS and NSIA Procurement System using Angular and Angular Material.
- Implemented frontend logic for various projects such as NAQS Aquatic, ensuring seamless integration with backend services and optimal performance.
- Focused on delivering production-ready code while adhering to strict documentation and architectural guidelines.
- Contributed to the full software development lifecycle from planning to deployment in live environments.

Team Lead & Developer

LevelUp

April 2025 - Present, Lagos

- Led teams as a developer and mentor to deliver successful web applications.
- Managed the LevelUp LMS application, featuring Web3 and Web2.5 experiences, NFT certificates, and token rewards.
- Mentored students from zero to hero in frontend development and general software engineering.
- Acted as a team leader for over a year, ensuring the successful delivery of multiple outstanding projects.

Frontend Developer Mentor

Kodespot

May 2024 - Present, Ilorin

- Mentored students in frontend development, guiding students from foundational concepts to advanced implementation.
- Provided technical leadership and support to help students build real-world projects.
- Devised comprehensive curriculum enhancements to align training modules with current industry standards and tools, enriching the learning experience for aspiring frontend developers.

Frontend Developer Intern

Encentral Solutions Limited

June 2024 - November 2024, Abuja

- Collaborated with a team of 5 developers to build an employee management system using Angular and TypeScript.
- Focused on practicing frontend technologies and refining development skills through weekly assignments and real-world project contributions.
- Gained experience in team-based software development workflows and version control.

Frontend Developer Intern

Softrays IT

June 2023 - November 2023, Ilorin

- Engaged in intensive training and practice sessions focused on frontend development fundamentals.
- Built small-scale frontend projects to solidify knowledge in HTML, CSS, and JavaScript.
- Learned and applied UI/UX design principles, focusing on wireframing and prototyping.
- Enrolled in and completed Meta Frontend Developer course on Coursera for hands-on framework experience.

Digital Marketing Intern

Obatech Computer Training School

February 2022 - June 2022, Ilorin

- Built and managed websites using WordPress focusing on blog creation and content strategy.
- Executed comprehensive SEO strategies, covering both on-page and off-page optimization to improve search rankings.
- Created and managed social media accounts for targeted marketing and advertising campaigns.
- Gained hands-on experience in digital marketing and professional website management.

PROJECTS

Vibetrax (Music NFT Platform)

Angelhack X Moveathon • github.com/Freedteck/vibetrax

- Developed a music NFT platform built on IOTA, extending to SUI and Movement.
- Solo wrote the Move smart contracts and collaborated on the frontend and integration.

- Built features for upcoming artists and collaborators, including NFT minting and platform interactions.

Propatradex (Real Estate Platform)

Angelhack X Moveathon • github.com/Freedteck/propatrade-x

- Built a real estate platform on IOTA, now extending to Movement.
- Collaborated with frontend developers to deliver a seamless user experience for property transactions.
- Focused on integrating blockchain features with traditional real estate workflows.

Event Pass

Encode club • github.com/Freedteck/Event-pass

- Created a platform on Solana for deploying NFT-based attendance passes via QR codes or links.
- Implemented ownership verification to unlock token-gated event dashboards with live interactions.
- Managed the end-to-end development of the NFT minting and verification system using Metaplex library.

NDIC BLMS (Bank Liquidation Management System)

Encentral Solutions Limited

- Collaborated with a cross-functional team of developers to build the frontend of the Bank Liquidation Management System using Angular and Angular Material.
- Contributed to the development of complex, responsive user interfaces for managing critical financial liquidation data.
- Collaborated with backend engineers to integrate APIs and maintain consistent system functionality across the platform.
- Followed enterprise-level documentation and coding standards to deliver production-ready features within a team-based environment.

NSIA Procurement System

Encentral Solutions Limited

- Maintain and apply updates to production procurement management system.
- Collaborate with cross-functional teams to implement new features and resolve system issues.
- Ensure system reliability and optimal performance for end users.

NAQS Aquatic System

Encentral Solutions Limited

- Orchestrate system updates and implement feature improvements based on user requirements.
- Collaborate with backend and QA teams to ensure seamless system functionality.
- Optimize system performance through regular maintenance and code reviews.

DevVault - Developer Q&A Platform

Angelhack X Hedera • github.com/Freedteck/DevVault

- Solo developed a 100% on-chain developer Q&A platform built entirely on Hedera.
- Implemented features including tipping with platform tokens, bounty-based questions (Hbar), and a reputation system.
- Developed functionality for marking helpful comments, posting updates, and a global leaderboard.
- Integrated Hedera SDK and Native services for seamless on-chain interactions and real-time updates.

EDUCATION

Bachelor of Engineering in Computer Engineering

University of Ilorin • Ilorin, Nigeria • 2024

SKILLS

Core Skills: HTML, CSS, JavaScript, React, CSS Modules

Additional Skills: Angular, TypeScript, SASS, Tailwind CSS

Tools: Git, GitHub

Blockchain Technologies: dApp Development, Web3 Integration, Smart Contract Integration

UI/UX Design: Wireframing, Prototyping

CMS & SEO: WordPress, SEO

Soft Skills: Leadership, Mentorship, Collaboration, Adaptability, Communication, Problem-solving
